Contents

Preface

1 Introduction

- 1.1 Computer Subsystems
- 1.2 How the Subsystems Interact

2 <u>Data Storage Formats</u>

- 2.1 Bits and Groups of Bits
- 2.2 Mathematical Equivalence of Binary and Decimal
- 2.3 Unsigned Decimal to Binary Conversion
- 2.4 Memory A Place to Store Data (and Other Things)
- 2.5 <u>Using C Programs to Explore Data Formats</u>
- 2.6 Examining Memory With gdb
- 2.7 ASCII Character Code
- 2.8 write and read Functions
- 2.9 Exercises

3 Computer Arithmetic

- 3.1 Addition and Subtraction
- 3.2 Arithmetic Errors Unsigned Integers
- 3.3 <u>Arithmetic Errors Signed Integers</u>
- 3.4 Overflow and Signed Decimal Integers
 - 3.4.1 The Meaning of CF and OF
- 3.5 <u>C/C++ Basic Data Types</u>
 - 3.5.1 C/C++ Shift Operations
 - 3.5.2 C/C++ Bit Operations
 - 3.5.3 <u>C/C++ Data Type Conversions</u>
- 3.6 Other Codes
 - 3.6.1 <u>BCD Code</u>
 - 3.6.2 Gray Code
- 3.7 Exercises

4 Logic Gates

- 4.1 Boolean Algebra
- 4.2 Canonical (Standard) Forms
- 4.3 Boolean Function Minimization
 - 4.3.1 Minimization Using Algebraic Manipulations
 - 4.3.2 Minimization Using Graphic Tools
- 4.4 Crash Course in Electronics
 - 4.4.1 Power Supplies and Batteries
 - 4.4.2 Resistors, Capacitors, and Inductors
 - 4.4.3 CMOS Transistors
- 4.5 NAND and NOR Gates
- 4.6 Exercises

5 Logic Circuits

- 5.1 Combinational Logic Circuits
 - 5.1.1 Adder Circuits
 - 5.1.2 Ripple-Carry Addition/Subtraction Circuits

- 5.1.3 Decoders
- 5.1.4 Multiplexers
- 5.2 Programmable Logic Devices
 - 5.2.1 Programmable Logic Array (PLA)
 - 5.2.2 Read Only Memory (ROM)
 - 5.2.3 Programmable Array Logic (PAL)
- 5.3 Sequential Logic Circuits
 - 5.3.1 Clock Pulses
 - 5.3.2 Latches
 - 5.3.3 Flip-Flops
- 5.4 <u>Designing Sequential Circuits</u>
- 5.5 Memory Organization
 - 5.5.1 Registers
 - 5.5.2 Shift Registers
 - 5.5.3 Static Random Access Memory (SRAM)
 - 5.5.4 Dynamic Random Access Memory (DRAM)
- 5.6 Exercises

6 Central Processing Unit

- 6.1 CPU Overview
- 6.2 CPU Registers
- 6.3 CPU Interaction with Memory and I/O
- 6.4 Program Execution in the CPU
- 6.5 <u>Using gdb to View the CPU Registers</u>
- 6.6 Exercises

7 Programming in Assembly Language

- 7.1 Creating a New Program
- 7.2 <u>Program Organization</u>
 - 7.2.1 First instructions
 - 7.2.2 A Note About Syntax
 - 7.2.3 The Additional Assembly Language Generated by the Compiler
 - 7.2.4 Viewing Both the Assembly Language and C Source Code
 - 7.2.5 Minimum Program in 32-bit Mode
- 7.3 Assemblers and Linkers
 - 7.3.1 Assemblers
 - 7.3.2 Linkers
- 7.4 Creating a Program in Assembly Language
- 7.5 Instructions Introduced Thus Far
 - 7.5.1 Instructions
- 7.6 Exercises

8 Program Data - Input, Store, Output

- 8.1 Calling write in 64-bit Mode
- 8.2 Introduction to the Call Stack
- 8.3 Viewing the Call Stack
- 8.4 Local Variables on the Call Stack
 - 8.4.1 Calling printf and scanf in 64-bit Mode
- 8.5 <u>Designing the Local Variable Portion of the Call Stack</u>
- 8.6 <u>Using syscall to Perform I/O</u>
- 8.7 Calling Functions, 32-Bit Mode
- 8.8 Instructions Introduced Thus Far
 - 8.8.1 Instructions
 - 8.8.2 Addressing Modes
- 8.9 Exercises

9 Computer Operations

- 9.1 The Assignment Operator
- 9.2 Addition and Subtraction Operators
- 9.3 Introduction to Machine Code
 - 9.3.1 Assembler Listings
 - 9.3.2 General Format of Instructions
 - 9.3.3 REX Prefix Byte
 - 9.3.4 ModRM Byte
 - 9.3.5 **SIB Byte**
 - 9.3.6 The mov Instruction
 - 9.3.7 The add Instruction
- 9.4 <u>Instructions Introduced Thus Far</u>
 - 9.4.1 <u>Instructions</u>
 - 9.4.2 Addressing Modes
- 9.5 Exercises

10 Program Flow Constructs

- 10.1 Repetition
 - 10.1.1 Comparison Instructions
 - 10.1.2 Conditional Jumps
 - 10.1.3 <u>Unconditional Jump</u>
 - 10.1.4 while Loop
- 10.2 Binary Decisions
 - 10.2.1 Short-Circuit Evaluation
 - 10.2.2 Conditional Move
- 10.3 Instructions Introduced Thus Far
 - 10.3.1 Instructions
 - 10.3.2 Addressing Modes
- 10.4 Exercises

11 Writing Your Own Functions

- 11.1 Overview of Passing Arguments
- 11.2 More Than Six Arguments, 64-Bit Mode
- 11.3 Interface Between Functions, 32-Bit Mode
- 11.4 Instructions Introduced Thus Far
 - 11.4.1 <u>Instructions</u>
 - 11.4.2 Addressing Modes
- 11.5 Exercises

12 Bit Operations; Multiplication and Division

- 12.1 Logical Operators
- 12.2 Shifting Bits
- 12.3 Multiplication
- 12.4 Division
- 12.5 Negating Signed ints
- 12.6 Instructions Introduced Thus Far
 - 12.6.1 Instructions
 - 12.6.2 Addressing Modes
- 12.7 Exercises

13 Data Structures

- 13.1 <u>Arrays</u>
- 13.2 structs (Records)
- 13.3 structs as Function Arguments

13.4 Structs as C++ Objects
13.5 <u>Instructions Introduced Thus Far</u>
13.5.1 <u>Instructions</u>
13.5.2 Addressing Modes
13.6 Exercises
14 <u>Fractional Numbers</u>
14.1 Fractions in Binary
14.2 Fixed Point ints
14.3 Floating Point Format
14.4 <u>IEEE 754</u>
14.5 Floating Point Hardware
14.5.1 SSE2 Floating Point
14.5.2 x87 Floating Point Unit
14.5.3 3DNow! Floating Point
14.6 Comments About Numerical Accuracy
14.7 Instructions Introduced Thus Far
14.7.1 <u>Instructions</u>
14.7.2 Addressing Modes
14.8 Exercises
15 Interrupts and Exceptions
-
15.1 <u>Hardware Interrupts</u>
15.2 Exceptions
15.3 Software Interrupts
15.4 <u>CPU Response to an Interrupt or Exception</u>
15.5 <u>Return from Interrupt/Exception</u>
15.6 The syscall and sysret Instructions
15.7 Summary
15.8 <u>Instructions Introduced Thus Far</u>
15.8.1 Instructions
15.8.2 Addressing Modes
15.9 Exercises
16 <u>Input/Output</u>
16.1 Memory Timing
16.2 <u>I/O Device Timing</u>
16.3 <u>Bus Timing</u>
16.4 <u>I/O Interfacing</u>
16.5 <u>I/O Ports</u>
16.6 <u>Programming Issues</u>
16.7 <u>Interrupt-Driven I/O</u>
16.8 <u>I/O Instructions</u>
16.9 Exercises
A Reference Material
A.1 Basic Logic Gates
A.2 Register Names
A.2 <u>Register Names</u> A.3 <u>Argument Order in Registers</u>
A.4 Register Usage
A.5 Assembly Language Instructions Used in This Book
A.6 Addressing Modes
B <u>Using GNU make to Build Programs</u>

C Using the gdb Debugger for Assembly Language

D Embedding Assembly Code in a C Function

E Exercise Solutions

- E.2 <u>Data Storage Formats</u>
- E.3 Computer Arithmetic
- E.4 Logic Gates
- E.5 Logic Circuits
- E.6 Central Processing Unit
- E.7 Programming in Assembly Language
- E.8 Program Data Input, Store, Output
- E.9 Computer Operations
- E.10 Program Flow Constructs
- E.11 Writing Your Own Functions
- E.12 Bit Operations; Multiplication and Division
- E.13 <u>Data Structures</u>
- E.14 Fractional Numbers
- E.15 Interrupts and Exceptions
